## Exterior Spiral Staircase Type “Zola”

- The “Zola”, exterior spiral staircase, combines both strength and functionality for long lasting use.
- All metal parts have been protected by a hot zinc bath. This type of finish is used exclusively for outdoor staircases.
- Suitable for floor-to-floor heights from 2520 to 3050mm (please refer to the table below for alternative heights).
- Available in three diameters: 1200, 1400 and 1600mm.
- The standard kit contains 12 treads + landing platform and staircase railing.
- The handrail is made from black PVC. The bolts are made from stainless steel.
- Can be installed clockwise or anticlockwise.
- A comprehensive range of accessories enable the staircase to be customised to meet your personal requirements.
- This staircase is particularly suited for use as access to balcony or roof terrace areas.
- We recommend customers consult their building control office prior to installing any staircase to check that it fully meets their requirements.
- A complete easy to follow installation guide is provided.
- Please call or email for design and/or configuration assistance.

### Rise and Treads

- The standard staircase is suitable for use with floor-to-floor heights from 2520 to 3050mm with 10/13 rises en 10/13 treads.
- If you configure the staircase type “Zola” with  $13 + 3 = 16$  treads, as specified in the table below, then you will also need the additional centre post extension to complete the staircase.
- The rise can be adjusted between 210-230mm.
- The first rise is always 210mm.
